# HOW TO LAYER RIGHT

– HOW TO DRESS TO MAKE THE MOST OF YOUR WINTER!

Enjoying the winter is often just a matter of dressing up. The Lynx clothing lineup offers a wide range of options for wearing comfortable layers. Make sure that you stay comfortable and that you are dressed for the conditions and the temperature – both on the snowmobile and in other winter activities.

**1 Wearing properly layered clothing starts with a high-quality base layer.** A base layer of merino wool or technical fibers wicks moisture to the outer layers and keeps the skin dry, ensuring that you stay warm.

**2 The mid layer helps to regulate the body temperature.** You can add or take off mid layers depending on the weather and your activity level. For example, the Lynx Hybrid jacket and shorts are designed for active riding in freezing weather. The Primaloft insulation used in the Hybrid products keeps you warm, while a set of strategically placed stretch channels ensures that moisture is actively wicked out through the outer layer. Lynx clothing lineup offers three new insulation jacket options and other mid layer products that make sure that your riding experience is enjoyable in all conditions.

**3 Insulated layer.** Add or adjust the warmth with insulated layer. Insulated jacket protects from the elements with additional warmth. Insulated jacket can be used alone or under shell jackets. Lynx offers down insulated packable jackets and Hybrid jacket and shorts for ideal layering.

**4 Choose the outermost layer based on the temperature, the length of the trip and your riding style.** You can choose from a wide range of one- and two-piece suits. The high-quality materials of Lynx clothing range's outermost layer protect you from the wind and water, while also taking care of breathability and temperature regulation. We use Sympatex and RPM Max membranes in the outermost layer. They have been selected and tested with care to meet the needs of demanding riders and other winter sports enthusiasts. The season's new outer layer items include one-piece suits for men, women and children in the Lynx Squadron lineup.

## HOW TO CHOOSE LENS COLORS?

On brighter days, a darker or mirror lens will help to protect your eyes more from the harsh reflections of the sun on the snow. Flat light conditions require a lens that will allow more light through so you can use all the available light to your advantage. Medium tint lenses are made to be adaptable to a variety of

conditions. Lightly tinted lenses allows as much light in as possible and provides you with enhanced contrast throughout those darker days and snowfall. Clear lenses also for snowfall and dark conditions.

**All Radien lenses are UV (UVA/UVB) protected.**

**Smoke**  
VLT 6.83%
